Professional Summary

Computer Science undergraduate with hands-on experience in full-stack web development, REST API development, frontend engineering, backend integration, and machine learning projects. Skilled in Java, Python, React.js, Spring Boot, MySQL, and problem solving with strong understanding of software development, DBMS, data structures, and scalable application design.

Education

Vignan's Foundation for Science, Technology & Research 2023 – 2027
Bachelor of Technology in Computer Science and Engineering CGPA: 7.5/10

Vignan Junior College 2021 – 2023
Intermediate (MPC) 95%

Bhashyam High School 2020 – 2021
SSC 100%

Projects

Smart URL Manager 2025
Tech Stack: React.js, Spring Boot, MySQL Live Link

- Engineered a full-stack URL management application with URL shortening, malware detection, URL phishing detection, and click analytics functionalities.
- Designed responsive frontend interfaces using React.js and integrated backend services through REST APIs.
- Built backend processing modules and request handling workflows using Spring Boot.
- Maintained URL metadata and analytics storage using MySQL database integration.
- Enhanced application usability through UI updates and efficient API communication.

Music Player Web Application 2024
Tech Stack: HTML, CSS, JavaScript

- Created a responsive music player application with audio playback and playlist management functionalities.
- Integrated play, pause, skip, and volume control features using JavaScript event handling.
- Optimized user experience through responsive frontend design and interactive UI components.

Smart Waste Segregation System 2024
Tech Stack: Python, Machine Learning

- Built a machine learning-based waste classification system for automated waste segregation.
- Analyzed image datasets and applied feature extraction techniques for model training.
- Increased classification efficiency using supervised learning algorithms and optimized preprocessing workflows.

Technical Skills

- **Programming Languages:** Java, C, SQL ,Python
- **Frontend Technologies:** HTML, CSS, React.js
- **Backend Technologies:** Spring Boot, REST APIs
- **Database:** MySQL
- **Tools:** Git, GitHub, VS Code, Postman
- **Core Concepts:** Data Structures, DBMS, OOP, SDLC

Relevant Coursework

Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering

Certifications

- NPTEL Certifications in Public Speaking, E-Business, and Management Information Systems
- Cisco Certifications in Cybersecurity Essentials and Networking Basics
- Cambridge University Preliminary English Test (PET)

Leadership and Activities

- Coordinated national-level university event Mahotsav 2K24 at Vignan University.
- Participated in hackathons, technical seminars, and collaborative academic events.
